Summary

Experienced Front End developer specializing in creating solutions and applications using React.js and its derivatives. Currently employed in this role, with a focus on expanding expertise in Front End development and gaining experience in Back End development.

Experience

Accenture   July 2021 - Present
Frontend Developer   Warsaw

At Accenture I've worked on projects for:

Google

- Creating a responsive and user-friendly web application using **React.js with TypeScript.**
- Utilizing the **Tailwind CSS** library for efficient and maintainable styling.
- Using **Redux and Redux Toolkit** as a state management solution to handle complex application state.
- Creating API routes using **Node.js**, utilizing **Google Cloud API** for AI text generation and text-to-speech.

Meta

- Working with a large **React Native and PHP** codebases
- Adding and extending accessibility features of mobile and VR applications.

VeloBank

- Developing and maintaining a front-end application for a GenAI ChatBot.
- Utilizing **Docker, React, TypeScript, and Vite** to develop and build the application.
- Working with **Azure DevOps** as a version control management system.

Procter & Gamble

- Developing and maintaining a front-end application for a GenAI ChatBot.
- Creating interfaces for GenAI assistants and agents.
- Integrating a **React** frontend application with a **Python** backend.
- Working with **React, Styled Components, Material UI, and React Query**.

Lavazza

- Creating and extending the functionalities of front-end components with **React.js** and regular HTML markup, along with JavaScript (**jQuery**).
- Providing technical solutions for required functionalities.
- Working alongside SAP Gigya, Hybris, and Adobe Experience Manager developers.
- Integrating front-end components with **Redux Sagas**.

Accenture

- Creating a responsive and user-friendly web application using **React.js**, contributing to the overall front-end architecture.
- Utilizing the **Tailwind CSS** library for efficient and maintainable styling.
- Using **Redux and Redux Toolkit** as a state management solution to handle complex application state.
- Participated in code reviews, providing constructive feedback, and ensuring code quality and best practices were maintained.
- Worked in an agile development environment.

Self Employed   November 2017 - February 2022
SOCIAL NETWORK OWNER

- Managing an online network with approximately 50,000 registered users, and leading 20 staff members.
- UI/UX Design.
- Creating graphical user interfaces (React.js) and integrating with the back-end platform (REST API).
- Administering MySQL databases, hosting websites, and web apps (IIS).
- Programming game modes for multiplayer games (JavaScript, Node.js).

Self Employed   January 2019 - June 2021
Freelance

- Creating websites, JavaScript and Lua scripts, and MySQL databases (Windows Server, Linux).
